

Function The MegaMart support has been designed for the installation of any type of flooring on any surface, allowing inspection of the various systems beneath, without needing to demolish anything. The perfect final flooring-leveling is possible thanks to the nut with inside threading which allows movements in height to the nearest millimeter. The purpose of the G-04 ring nut is to millimetrically adjust the height of the MegaMart support. Rotating the G-04 RING NUT clockwise makes the MegaMart support raise, creating a double movement, both of the ring nut and of the head. Head T-04 can be fitted with the CG04-01 locknut to ensure the determined height between Head T-04 and locknut G-04. On the other hand, rotating the G-04 RING NUT counterclockwise makes the MegaMart support lower, creating a double movement, both of the ring nut and of the head. The G-04 ring nut can be fitted by a CG04-02 locknut to ensure the determined height between ring nut G-04 and base B-04 or between ring nut G-04 and extension P04. The added value of MegaMart supports is speed of installation of the extension P-04, thanks to the bayonet quick coupling.

Compatibility -

Range h 215-320 - h 315-420 - h 415-520 - h 515-620 - h 615-720 - h 715-820 - h 815-920 - h 915-1020

Performance The material they are made of makes them resistant to acidic and basic solutions and weathering.

Operating temperature -40°C; +75°C

Recycled product Yes

Recyclable product Yes

Included accessories: -

Material PP T 20%

Optional accessories: Slope regulator
 Levellers
 Adjustable handle
 Distribution disc
 -

Additional information

MegaMart supports are made 100% with regenerated material from refinery plant. All types of MegaMart are guaranteed to bear concentrated loads of 800 kg each.

If not otherwise indicated, all measurements are expressed in millimetres.
